ACHIEVEMENTS

- Revamped the Smart Finance website for easy software purchases.
- Launched a crypto product-selling website.
- Developed the Smart IT Job site for project management.
- Built a Smart IT Job application on Android with seamless login, registration and video content display.
- Created the Smart Trading Tool for desktop and Android with 25+ trading strategies.
- Contributed to group projects, demonstrating strong teamwork.

WORK EXPERIENCE

Since joining Smart Finance in October 2022, I have developed the Smart finance website, a cryptocurrency product site, and a job-seeking platform. I also created a smart analysis tool and a video courses desktop application, maintained these websites, and developed the Smart Trading Tool, implementing trading strategies using real-time API data. Additionally, I provide ongoing client support and maintain our Websites and WPF software applications.

PROJECTS

Smart Finance(Fullstack Developer) OCT 2022 - SEP 2024

- **Smart Finance** - www.smartfinancein.com

(Jan 2023 - Apr 2023):

I developed our main website using HTML, CSS, JavaScript, and PHP, enhancing its visual appeal and overall functionality significantly.

- **Smart IT Job** - www.smartitjob.com (Feb 2024 - May 2024):

I contributed to this job-seeking website for Smart IT, which features 100 projects, a user login system with CAPTCHA verification, automatic session logout, and options for users to purchase projects for their portfolios.

- **Crypto Smart Analysis** - www.cryptosmartanalysis.com

(May 2023 - Oct 2023):

I developed this static site using HTML, CSS, JavaScript, and PHP. The website showcases three unique crypto products and includes a registration page with CAPTCHA, a 7-day free trial system via PHP mail, automatic username generation, a demo video player, and PayPal integration.

- **Projects for Smart IT Job** (Nov 2023 - Feb 2024):

Developed projects for the Smart IT Job website (www.smartitjob.com) using React, Android, PHP, JavaScript, and C#. These projects were created specifically for sale, aimed at helping job seekers enhance their skills and job prospects.

- **WPF Software Development** (Jun 2024 - Oct 2024):

I developed and maintain the Smart Trading Tool desktop app (WPF with C#), implementing 30 trading strategies using APIs for historical (PHP) and live data (Money Control). I also created a WPF-based eBook reader and video course software with integrated login and logout functionality.
