EDUCATION

EGS Pillay Engineering College   **2018 - 2022**
- B.Tech - Information Technology (CGPA: 7.78)

TECHNICAL SKILLS

- HTML, CSS(Bootstrap), JavaScript, PHP, MySQL, API Integration, SEO, Database Management, WPF Software(.net framework), GitHub.

WORK EXPERIENCE

Fullstack Developer , Smart Finance   **Sep 2022 - Present**

- Since joining Smart Finance in September 2022, I've developed websites like a Smart Finance analysis platform, a crypto site, and job-seeker solutions. I created the Smart Trading Tool with 50+ strategies using real-time API data and a secure video course app. I also manage websites, WPF apps, client support, and software updates.

PROJECTS

Smart Finance - www.smartfinancein.com   **Dec 2021 - Feb 2023**
- I developed our main website using HTML, CSS, JavaScript, PHP and MySql, enhancing its visual appeal and overall functionality significantly.

Smart IT Job - www.smartitjob.com   **Mar 2023 - Jun 2023**
- I developed job-seeking website for Smart IT, which features 100 projects, a user login system with CAPTCHA verification, automatic session logout, and options for users to purchase projects for their portfolios.

Crypto Smart Analysis - www.cryptosmartanalysis.com   **Jul 2023 - Sep 2023**
- I developed this static site using HTML, CSS, JavaScript, and PHP. The website showcases three unique crypto products and includes a registration page with CAPTCHA, a 7-day free trial system via PHP mail, automatic username generation, a demo video player, and PayPal integration.

PHP data updation part(Web)   **Oct 2023 - Dec 2023**
- We have Share market analysis softwares. here we want share market all live, open, high, low, close and historical datas. so we are update the all datas in database for software analysis. so we created data updation part using Html, css and php and MySql.

WPF Software Development   **Jan 2024 Working in Progress**
- I developed and maintain the Smart Trading Tool desktop app (WPF with C#), implementing 30 trading strategies using APIs for historical (PHP) and live data (Money Control). I also created a WPF-based eBook reader and video course software with integrated login and logout functionality.
